Dear Sam, This is what I ~~xxrotexxyou~~ spoke to you about. I would like to have all the available files on these copyrights examined and would like Xeroxed copies of all pages with handwritting. I presume all the files are public. Certainly those of the actual applications are. I think it best that whoever does this not indicate that it is the handwriting I am interested in or why. If there is any problem, and I do not anticipate one, a Mr. Mark Lillis, chief of the book division, has been very hekpful to me and would probably assist anyone who phoned him and asked for his help on my behalf. While I also expect nothing of exceptional interest in the files, I would be interested in anything of this sort that might be there and would want such information Xeroxed also. When you get it, I will pick it up. Many thanks.

HW
